## TOTAL CONTROL BATTING

Using Total Control Batching, the Advanced Batching Cursor allows you to guess the pitch type and/or pitch location of the opposing pitcher. A correct guess for a pitch type or location will result in a bigger batting cursor and brings up a blinking lock-on indicator that gives your batter more power. An incorrect guess will result in a batting cursor that is decreased in size making it tougher to hit the pitch.

To help with your guess, a pitch location box will appear showing the pitch history of your at-bat. It will display the pitch locations, number of pitches, and pitch types previously thrown to the batter. Until the first pitch is thrown in a new at-bat, the pitch history will display the pitches thrown during the last at-bat.

Guess a pitch location	<b>L2</b> + $\leftarrow$ , $\rightarrow$ , $\uparrow$ , or $\downarrow$
Guess a pitch type	<b>L2</b> + $\odot$ , $\triangle$ , $\square$ , or $\times$
